Waiver of Liability: We prioritize a smooth and safe installation process, and although we exercise utmost care, it is important to note that our liability does NOT extend to broken utility lines, including water, electric, gas, communication, and sewer lines. To ensure the safety of your property, we kindly recommend that you contact 811, a free service managed by Underground Service Alert.

When you reach out to 811, they will promptly coordinate with PG&E and other relevant companies in your area to mark the locations of their underground lines. This precautionary measure will help you avoid any utility lines during the digging process and ensure a secure and trouble-free installation. precautionary measure will help you avoid any utility lines during the digging process and ensure a secure and trouble-

1) Utility lines:

We want to be sure we don't install above any utility lines, we usually lookout for outdoor kitchen/grills or water pool equipment that can potentially be running underneath. If you are unsure, the city can do a complementary evaluation when you contact them to 611. They send a representative and mark any gas, water, sewer, lines, etc.

2) Outdoor Outlet:

We run an extension cord up to 50' to the nearest outdoor outlet, so please let us know which outlet will be the designated outlet.

3) Excavator Clearance:

We use an excavator to dig the trampoline pit, requiring a minimum clearance of 3.5 feet in width. As we approach the installation date, please inform us of the most suitable entry point for our equipment. Our team is equipped to handle a variety of soil types during the excavation process. If sufficient clearance is unavailable, we can complete the project manually, which will incur an additional \$500 charge and may extend the project by an extra day.

We kindly ask that you inform us in advance if you are aware of any solid surfaces, such as concrete or rock, in the designated area, as this may require specialized equipment. Please be aware that if we encounter these materials during excavation, an additional fee of **\$500** will apply to cover the extra work. Should you require us to haul away excess dirt, that service is also available for an additional **\$500 per trip**.

Optional:

In addition, we provide the option to enhance the aesthetics by laying SOD after the trampoline installation. It's something worth considering and discussing with your spouse. Attached are some pictures illustrating the difference with and without SOD. Our pricing is \$780 per pallet, and typically, we use 1.5-2 pallets depending on the designated area's slope. Turf varies from \$9-\$15/[sq.ft.](#)

Additionally, we do reroute up to two sprinkler lines at no extra charge if we encounter any during excavation, excluding the main line. Rerouting the main line requires additional work to redirect both the line itself and the system's cables, which necessitates an extra day for completion.

The invoice is scheduled for payment on the day of installation upon project completion. You'll get an additional email from our billing platform where we'll provide convenient options for

electronic payment, or if you prefer, you can opt to settle the invoice by check or cash after installation is complete.

Please review our Installation Agreement Form when you get a minute and feel free to initial, sign, and email back or give it to us in person the day of install.
